

# ADVANCE ROTOFLEX PVT.LTD.

A Complete Solution For Flexible Packaging

**9 Colors Rotogravure Printing Machine**

**Advance Rotoflex Pvt. Ltd.**, in the packaging industry ever since its inception in the **Year 1988**, has risen to one of the **leading flexible packaging materials manufacturer in India**. **Printed laminates made by Advance Hi Tech Machineries**, printed in up to **nine** colors depending on the barrier properties and shelf life of the product required. Multi layer laminates of various combination's ranging single layer to **four** layers such as Pet -Poly, Pet -Metpet -Poly, Bopp - Extrusion laminate -Metpet -Poly, Bopp -Bopp, Pet -Bopp etc., to pack products such as biscuits, candies, chocolates, potato chips, snack foods, tea, coffee, spices, sugar, salt, noodles, cereals, dry fruits, rice, pesticides, liquor, oils, fertilizers, engineering products, etc.

## Profile

Packaging presents the first impression and constitutes a virtual show-window of the product. Besides carrying a fact-file on the product, it is, however, at a glance at the colors and quality of the wrapper that determines the appeal of the product.

The best packaging is highly competitive, and the pack with the finest wrapping and the most compelling graphics takes the cake.

Having determined to uphold the highest standards in packaging, the technical team at **Advance Rotoflex Pvt. Ltd.** have steered the Company to become the virtual leaders in the field of quality international packaging.

## Multi Layer Film Extrusion Machine

### Infrastructure

Our unit is well equipped with Ultra - modern machineries to make flexible packaging material.

We have following machines in our plant:

- \* **9 Colour Rotogravure printing machine** with Auto Registration and Web Video.  
(one - 9 color and two - 8 color printing machine)
- \* **High Tech & High Speed Solvent less Lamination Machines**
- \* **Co-Extrusion-coating-lamination machine** for snacks, biscuits, cake, confectionery, pharma Products etc.
- \* **Doctoring Rewinding Machine**
- \* **High Speed Servo Driven Duplex type Slitter Rewinder**
- \* **Servo Driven Pouching Machines**
- \* **Standing & Zip Lock Pouching Machine**

Latest testing equipment are used by skilled technicians at our **Research & Development Department**.  
We use best available Food grade raw material for manufacturing packaging products.

### Our range is comprised of following Products

- \* Laminated Printed Film Rolls
- \* Laminated Printed Pouch
- \* Zipper Pouches
- \* Standy Pouches
- \* Perforated Pouches
- \* Jumbo Laminated Bag
- \* Six Side Seal Pouches
- \* Heat Shrink Sleeves
- \* Multi Layer Film
- \* Four Layer Laminated Rolls

### Slitting Machine

## Co-Extrusion-coating-lamination machine

## Quality Assurance

The manufacturing of all the products are as per the defined quality norms. The raw materials which are used viz. the granules, pet films, inks, adhesives and other chemicals are sourced from companies with good reputation and goodwill in terms of quality. Further, the products undergo various tests to ensure the best quality and hygienic output reaches to the customers. Following are the parameters on which the products are tested :

- \* Tensile strength
- \* Elongation
- \* Opacity and transparency
- \* Dart impact
- \* Heat seal strength
- \* Lamination Bond strength
- \* Curing test
